AGRICULTURAL CASE STUDY

GB Unitrans® XT, a premium UTTO formulated to meet the challenging requirements of agricultural machinery and provide the highest level of rationalisation possible across a varied agricultural fleet.

GB LUBRICANTS

CHALLENGE:

Modern farming equipment requires a high performing product that can cover multiple OEMs to meet service fill needs.

- Different vehicle types, ages, applications and OEM requirements all present different challenges for the lubricant.
- Customer requirement for a single oil that can provide reliable equipment protection across all major OEM brands.

SOLUTION:

Using advanced additive systems to formulate a product that exceeds OEM performance requirements.

- Multi-functional additive chemistry selected to provide final drive, hydraulic, wet brake, clutch & transmission performance.
- Final formulation aims to cover as many OEMs as possible to help rationalise products required across a fleet.

OUTCOME:

Provide a service fill solution that meets agricultural OEM requirements and various performance advantages.

- Customers can decrease the number of lubricants required for their equipment.
- Performance across a range of OEMs and applications.
- Proven field performance, with reports of elimination of component failures and malfunctions.

BENEFIT:

GB Unitrans® XT offers the highest level of rationalisation for agricultural machinery. Simplifying servicing with one product for transaxle and hydraulic requirements reduces chances of misapplication. Reliable protection means less equipment downtime and increased productivity.

GB Unitrans® XT

High Performance Universal Tractor Transmission Oil

Formulated for use in agricultural and off-highway equipment for applications including transmissions, hydraulic systems, wet brakes, PTOs, final drives, torque converters.

- Excellent oxidation and thermal stability
- Improved brake squawk control due to superior friction durability
- Performance across a range of OEMs

AVAILABLE PACK SIZES:

- 25L drum
- 205L barrel
- 1,000L IBC
- Bulk filling tank
